AZ-900 Last Minute Revision (Focus on Incorrect Answers)

30. Which tool helps you estimate cost savings when migrating workloads to Azure?

Your Answer: A | Correct Answer: B

Explanation: Azure TCO Calculator estimates cost savings for migrating to Azure. The Pricing Calculator estimates Azure service costs, not savings.

34. Which service helps automate workflows and integrate apps, data, and services?

Your Answer: A | Correct Answer: B

Explanation: Azure Logic Apps is the correct tool for serverless workflows. Azure Functions is more code-focused and event-driven.

38. Which Azure service is best suited for lift-and-shift of existing applications?

Your Answer: A | Correct Answer: C

Explanation: Azure Virtual Machines is best suited for lift-and-shift scenarios, as it allows moving existing workloads without code changes.

39. Which of the following is an example of an IaaS offering in Azure?

Your Answer: C | Correct Answer: A

Explanation: Azure Blob Storage is IaaS. Azure Functions is a PaaS (Platform as a Service).
